

Application

Measurement and indication of web edge position in various types of machinery.

Industry

Printing and Graphics Machinery
Special Machines
Textile Machinery

Application Overview

The position of a web must be monitored to ensure proper feeding into downstream processes, and prevent jams.

Application Challenges

Web position must be very precisely controlled.

Solution(s)

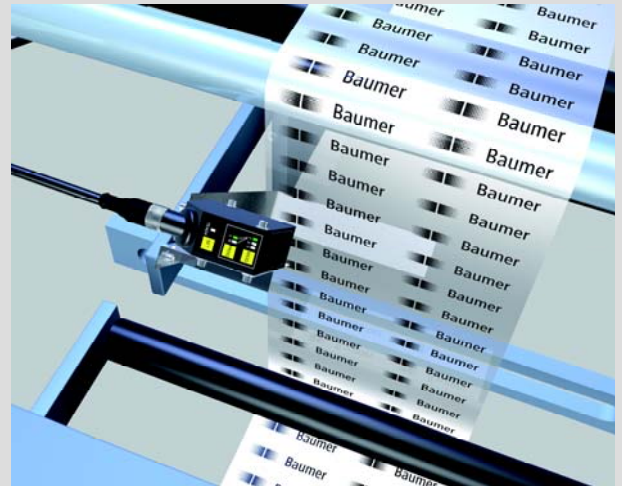

A line sensor can precisely monitor the position and provide analog feedback to positioning drives to maintain appropriate position.

Examples include the following:

ZADM 023H300.0001, line sensor with 30 mm measuring range
ZADM 023H151.0001, line sensor with 150 mm measuring range

Supporting Documentation

- Baumer Sensor Solutions Catalog, page 514.
- Baumer Website: [ZADM Series Line Sensor](#).

PosCon line sensor measures and indicated web edge position.
